OBJECTIVE

I am a skilled Software Developer with a passion for innovation and problem-solving. I am seeking a challenging IT position that will allow me to leverage my technical skills and experience to design and develop cutting-edge software solutions that solve complex business problems, streamline processes, and enhance user experiences. I am committed to delivering high-quality work that adds tangible value to organizations, and I am eager to contribute my expertise to a dynamic and collaborative team.

WORK EXPERIENCE

Jan 2023 — Present

TechnoMark
Software Developer

I am employed as a .NET Developer at this company. In this role, I am responsible for developing and maintaining .NET applications using various programming languages, frameworks, and technologies. I work closely with cross-functional teams, including project managers, designers, and QA professionals, to ensure that software solutions are developed to meet client requirements and delivered on time and within budget. In addition, I collaborate with colleagues to identify and implement process improvements and best practices for software development.

EDUCATION

Jun 2018 — Apr 2021

G.L.S. University
7.33/10 CGPA

Jun 2021 — Apr 2023

G.L.S. University
7.2/10

PROJECTS

Feb 2020 — May 2020

P.G.Discovering

Created an application that helps to find the nearest P.G. (Paying Guest) with the help of a GPS system. It shows detailed information about that particular P.G. It also shows the payment method but we only developed this application and could not deploy it in the play store.

Apr 2021 — Jun 2021

Smart Contract Real Estate

Designed a model for real estate using Solidity language and also used EVM (Ethereum Virtual Machine)

Jul 2022 — Present

RPA / BOT Project (Based on Call Centre)

Designed a system for creating an environment for the user that helps them not to wait any longer for the output. Used Python as a language and used many python libraries to designed this system.

Jan 2023 — Present	**WatchStore (E-Commerce Website)**

WatchStore is a fully functional e-commerce website that I designed and created using ASP.NET Core MVC. The website offers a wide choice of high-quality watches for users to browse and purchase online. The website includes a user-friendly layout that allows customers to simply search for timepieces, browse thorough product descriptions, and finish their transactions securely and conveniently.

CERTIFICATIONS

16 Feb 2021	**Complete Machine Learning and Data Science Bootcamp**

Udemy
Completed this course online on Machine learning and Data science Bootcamp on Udemy.

8 Mar 2020	**TensorFlow Developer Certificate in 2022**

Udemy
Completed the TensorFlow developer course from the online course website Udemy.

11 Jun 2021	**Introduction to Cloud Computing on AWS**

Udemy
I completed an introductory course on cloud computing in Amazon Web Services (AWS), which provided me with a comprehensive understanding of cloud computing concepts and how they can be applied to AWS services. Throughout the course, I gained hands-on experience working with various AWS services, including Elastic Compute Cloud (EC2), Simple Storage Service (S3), and Relational Database Service (RDS).

14 Jul 2022	**Generation of Machine Learning Dataset from RDBMS for clustering and Association Analysis**

Gradiva Review Journal
We looked into how to create a machine learning dataset from an existing relational database, applied unsupervised machine learning algorithms to it, assessed those methods, and then compared the results.

17 Mar 2023	**Complete guide to ASP.NET Core MVC (.NET 6)**

Udemy
I learned how to develop ASP.NET MVC applications using Visual Studio, C#, and HTML/CSS, and how to utilize the full range of features and capabilities offered by the ASP.NET MVC framework, including routing, controllers, models, views, and form validation. I also gained experience in working with various data access technologies, such as Entity Framework and LINQ, and how to integrate them into my MVC applications. This course provided me with a solid foundation in ASP.NET MVC, razor Pages, and Core Web API development, and I am confident that I can apply the knowledge and skills I gained to build high-quality web applications that meet the needs of clients and users.
